LX-NF-NMT1010T

IP 67	IK 08	CRI >90	DC24V
-----------------	-----------------	-------------------	--------------

UV RESISTANT	FLAME RESISTANT	SALTWATER RESISTANT	SOLVENT RESISTANT
---------------------	------------------------	----------------------------	--------------------------

5 GARANTIE	CE	RoHS	60000h
----------------------	-----------	-------------	---------------

NEON FLEX

- Light source: SMD2835, LM80 proved.
- Process & Material: High light transmittance, environmental silicone material, integrated extrusion molding technology, IP67.
- Optical Design: 10M driven by one end, arbitrary cutting.
- Appearance Design: Compared with the traditional neon tube or PVC guardrail tube, the silicone material has good flexibility, the simple and stylish appearance, which is exquisite and unique.
- Product Certification: UL, CE, ROHS.
- Environmental Features: Resistance to saline solutions, acids & alkali, corrosive gases and UV.
- Working/Storage Temperature: Ta:-25~55°C / 0°C ~ 60°C.
- Application : outdoor/internal decorative lighting, architectural contour application.

Solution of controll system

Product Image	product name	Product number	Order code	Product specifications	Applicable Products
	Monochrome remote	LX-CK1-GBA	402-02-000000-00001	output signal : RF Working voltage: 3VDC(CR2032) Remote control distance 30m Working temperature: Ta: 0-30°C-0+55 °C	Monochrome light strip (Use with LX-CR1-GBA)
	Monochrome light controller	LX-CR1-GBA	402-01-000000-00001	Input voltage : DC12-48V Output current : 15A@12V/24V, 10A@36V/48V Output Power : Max 180W@12V/Max 360W@24V/Max 360W@36V/Max 480W@48V Working temperature: -30°C— +55°C	Monochrome light strip (Use with LX-CR1-GBA)

Precautions

- Use a 24V DC isolated power supply to drive the neon lamp strip and the ripple wave of constant voltage source shall be less than 5%. It is not allowed to use RC voltage reduction or non-isolated power supply to drive the neon lamp strip.
- In actual applications, 20% of the power supply shall be kept (only 80% of the power is used) to guarantee that sufficient voltage is available to drive the product.
- Attention shall be paid to safe operation. After powering on, it is not allowed to touch the AC power supply to avoid an electric shock.
- Attention shall be paid to the positive and negative poles of the wires during installation and whether the power supply conforms to required voltages to avoid damages.
- Avoid scratching, distortion and irregular bending of the product during installation; otherwise it may cause irreparable damage to the product.
- Please do not bend the strip into an arc with a diameter less than 60mm to ensure the longevity and reliability, the bending diameter too small will damage the product itself.
- If the actual length of application exceeds the specified using length, it will lead to overload heating and uneven brightness.
- Non-professionals are prohibited from installing, disassembling and repairing the product.
- Do not use any acid or alkaline adhesive to fix products (including not limited to glass cement, etc.)
- Product is not suitable for use in swimming pools and fountains.
- Please confirmed before usage as products of varied sizes show slight differences in their color under same color temperature due to their structural differences.
- When IP65 protective products are installed and applied, the waterproofing grade should be degraded after self-processing and cutting.
- In mass production, 1-2 splices are allowed within every 5 meters.
- Please use professional cutting tools when cutting.

No stretching

No distortion

No trampling
