

NEON FLEX

LX-NF-NMT1515-PRO

IP 68	IP 67	IK 08	CRI >90	DC24-48V
-----------------	-----------------	-----------------	-------------------	-----------------

UV RESISTANT	FLAME RESISTANT	SALTWATER RESISTANT	SOLVENT RESISTANT
---------------------	------------------------	----------------------------	--------------------------

5 GARANTIE	CE	RoHS	60000h
----------------------	-----------	-------------	---------------

NEON FLEX

- Light source: high luminous efficiency LED lamp beads, LM80 test certification;
- Process material: three-color silicone extrusion technique is applied, Cutting mark more clear;
- Optical design: unique optical light distribution structure design, uniform light emission on the surface without shadows;
- Appearance design: Standard ESD oil spray, anti-dust; good flexibility, simple shape, exquisite and unique;
- Product certification: UL, CE, ROHS, UKCA, CB;
- Environmental characteristics: salt solution resistance, acid and alkali corrosion resistance, flame retardant resistance, UV resistance;
- Working/Storage Temperature: Ta: -25~55°C / 0°C ~ 60°C.
- Symphony working/storage temperature: Ta: -20~40°C / 0°C~60°C;
- Application : signboard lighting, outdoor/internal decorative lighting, architectural contour application;

- Note : 1、 The above data is the testing result of 1M standard product;
- The luminous flux is allowed to have an error range of $\pm 10\%$;
- The above parameters are typical values;

Product mechanical parameters

• IP68Full encapsulated cap(EP)-top outlet

• IP68Full encapsulated cap(EP)-bottom outlet

• IP68Full encapsulated cap(EP)-side outlet

Precautions

· Please use an isolated power supply to drive the LED light bar, and the ripple of the constant voltage source is less than 5%. Do not use resistance-capacitance step-down, non-isolated power supplies to drive the LED light bar.

· In actual applications, the power supply should reserve 20% of the margin (it is recommended to use only 80% of the power) to ensure sufficient voltage to drive the product.

· Please operate carefully, do not touch the AC power terminal when the power is on to prevent electric shock.

· Pay attention to the positive and negative poles of the power cord, and do not connect it wrongly. Whether the voltage of the power supply and the product are the same, so as to avoid damage to the product.

· During the installation process, please avoid scratching, twisting and irregular bending of the product, otherwise it may cause irreparable damage to the product.

· In order to ensure the life and reliability of the light strip, please do not bend it in an arc with a radius of less than 60mm. A too small bending radius will damage the product itself.

· If the actual application length exceeds the specified use length, it will cause the lamp belt to overload and heat, and the brightness is uneven.

· In order to prevent your eyes from being hurt, try to avoid staring at the light-emitting surface of the light bar for a long time.

· Non-professionals are prohibited from installing, disassembling and repairing the product.

· It is strictly forbidden to use any acidic or alkaline adhesives to fix products (including but not limited to glass glue, etc.).

· IP67 protection products are not suitable for swimming pool underwater.

· Products of different sizes and specifications under the same color temperature value due to structural differences, the final color of the product is slightly deviated, and it must be confirmed before use.

· When the IP67 protection product is installed and applied, the waterproof level needs to be downgraded after self-processing and cutting.

· Please use professional cutting tools when cutting.

· Engineering packaging neon light belt (20~50m), please use pay-off rack during construction to avoid damage to the product caused by pulling force.

· Attention, there are 2 soldering parts per reel (5m/reel) at most when mass production.

No stretching

No distortion

No trampling
